FUTUREX

Staffing Capability Brief

Specialist hiring. Structured evaluation. Clear ownership.

Capability coverage

Java Full Stack and React UI; .NET, SQL, Mainframe, Kofax, Gloss, SAP, AI/ML, Agentic AI, DevOps, cloud and security. Data Engineers, Databricks / Snowflake Engineers, Email Security, Product Owners, Business Analysts and Project Managers.

Engagement models

Permanent and niche search, contract staffing, contract-to-hire, RPO and dedicated teams. Executive, campus and volume hiring scope and capacity are confirmed during discovery.

Evaluation and evidence

Agree technical and domain screening, recruiter-reviewed candidate packs and client interviews. AI-assisted screening and proctored assessments are subject to tool/provider availability, consent and separately agreed scope. Automated integrity flags require review.

Delivery and joining

Role calibration, sourcing, interview coordination, feedback tracking, offer discussions and notice-period engagement. Agree verification provider, joining prerequisites, named contacts and escalation paths.

What to share

Roles, skills, headcount, experience, compensation or rate range, location, working arrangement, start-date window and interview process.
